C. Certificates of Economic Hardship

The Historic Preservation Commission considered no applications for Certificates of Economic Hardship during the period January 1, 2017 through December 31, 2017.

D. Landmark Designations

The Historic Preservation Commission requires a two-step process for landmarking. The applicant is required to first submit a Landmark Nomination application, which is an abbreviated version of the full Landmark Application. The purpose is to make the determination (by the Historic Preservation Commission) that a residence, structure or place is landmark-eligible before the applicant prepares the longer, more time-intensive Landmark Application. It should be noted that the Waukegan City Council would not approve the Historic Preservation Ordinance on December 17, 2001 unless the ordinance specifically noted that properties could only be voluntarily landmarked. Properties cannot be landmarked without the owner’s consent. This has led to many structures, well-deserving of landmark status, to be demolished or detrimentally-altered since a Certificate of Appropriateness was not required. There were two (2) properties that were designated a Waukegan Landmark by the Waukegan City Council during the period January 1, 2017 through December 31, 2017. The Historic Preservation Commission considered no landmark amendment applications or landmark rescissions during that same reporting period.

E. Survey

Nearly 4,581 homes underwent an architectural survey in 2007. It was the original intent of this historic resource survey to survey all residential areas of the city. This would have provided the Historic Preservation Commission with an overall encompassing document to guide and direct their efforts towards the areas of the city that needed their attention most. Due to limitations of time and resources, the scope of the survey was limited to almost all areas developed up to 1929. The purpose of the survey was to ascertain which structures retained integrity on the exterior. As such, the survey was concerned with cladding, roofing materials, proportion, massing, porches, architectural detail and windows. The buildings were divided into five categories:

1. High significance/contributing (Red) – No alterations or all original features restored.
2. High significance/contributing (Orange) – Minor alterations that are reversible, i.e. improper siding, missing details, replacement windows.
3. Low significance/contributing (Yellow) – More significant alterations that are not easily reversible, i.e. enclosed porches, small additions.
4. No significance/non-contributing (Green) – Many alterations that render the original structure largely unrecognizable, i.e. major additions to several sides of the structure, addition/removal of stories.
5. No significance/non-contributing (Blue) – Construction less than fifty years old that has no significance individually, i.e. 1960’s ranch housing, 1970’s split level.

It is this survey that the Historic Preservation Commission has utilized on a yearly basis to determine which property owners to approach in regards to landmarking their residences/buildings. If ownership of these residences/buildings changes, the Historic Preservation Commission approaches the new owners to see if there is interest in landmarking their recent acquisition. In 2011, staff undertook a photographic survey of all the residences that were listed as contributing properties in the establishment of the Near North Historic District which was listed on the National Register of Historic Places in 1978. Unfortunately, not all residences were documented as they were demolished prior to the adoption of Waukegan’s Historic Preservation Ordinance and creation of the Waukegan Historic Preservation Commission in 2001.

No additional surveys were undertaken in Waukegan during the period January 1, 2017 through December 31, 2017.

F. National Register

No properties were added to the National Register of Historic Places during the period January 1, 2017 through December 31, 2017.

Publication for public hearing will be made for the May HPC meeting.
